Technical Expertise, Quality, Execution, Delivered!

MAXIMA PPG LINING

Anti-corrosion Lining; Lasts long, really long!

Before PPG Lining

After PPG Lining

Technical Highlights:

- Minimal number of joints. All joints are thoroughly Spark tested
- A very high bonding strength of PPG with RCC (38.65kg/CM²) makes the bonding with RCC 99% permanent.
- No curing / drying is required after finishing – hence reduced system, plant and equipment downtimes

Applications:

- C.W Dosing
- Any area with spillage of acid
- Neutrilizing pit
- D. M. Plant, drains and pits
- Battery room
- ETP tank
- Sludge pit
- Backwash area
- Chemical storage tank and many more...

Advantages:

- PPG Lining is cheaper and has more advantages than Acid Alkali tile
- Available in multiple colors, as required
- Different size of sheets available
- If required, we can execute more than 75 SQM job per day

Specifications:

- Expected life of PPG lining is 8 years
- We also undertake prefabricated jobs
- Any lining will require a dry and plain surface
- Application on concrete surface itself
